Location: Fort Liberty - Fayetteville, NC

Clearance Requirement - Top Secret with SCI

Job Description

We are seeking a highly skilled Computer Systems Engineer to join our team at Fort Liberty, Fayetteville, NC. The ideal candidate will be responsible for designing, developing, testing, and delivering developmental PAI (Publicly Available Information) capabilities while ensuring compliance with security standards and compatibility with existing network and operating systems.

Education & Experience (Required):

- Proficiency in Python (or any backend language such as C, C++, C#, Java, etc.), CSS/3, HTML/5, and JavaScript
- Experience with ReactJS, AngularJS, JQuery, Bootstrap for framework development
- Familiarity with techniques such as Single Page Applications, AJAX, and DataTables
- Knowledge of Visualization Frameworks such as Kibana, D3, ChartJS, Plotly
- Operating Systems: Linux, Ubuntu, CentOS, Windows
- Proficiency in Swift or Objective-C (for Apple Development) and Java or Kotlin (for Android)
- Experience with Python tools/packages including pip, pipenv, pandas, Flask, Django, celery, sqlalchemy
- Proficiency in databases such as MongoDB, Postgres, SQLite, Redis/RabbitMQ (in-memory databasing)
- Experience with relational and non-relational database modeling, system administration, API calling, modularity, tasking/queueing, containerization, proxies, OpenSSL, and security authentication
- Knowledge of cloud deployment using EC2, S3, Beanstalk/Docker
- Familiarity with security standards minimization, semi-automated and automated collection, operating system compatibility, graphic user interface development, foreign language compatibility, and export data interoperability
- Bachelor's degree in computer science or a related field

Schedule

- 3 days a week onsite, 2 days a week remote, 40 hours per week.
- Core Hours: 8:30am – 5:30pm.

Deploy360 Overview

Join Deploy360, a leading user-centered software development company specializing in providing software engineering services for the Department of Defense (DoD). At Deploy360, we prioritize continuous software improvement, recognizing the evolving needs of the DoD's business processes.

Deploy360 stands out as a fully integrated, end-to-end software development and DevSecOps managed service provider. Our suite of services and innovative technology enables application development at scale with enhanced speed, efficiency, and cost-effectiveness. Leveraging our proprietary Software Factory, development teams can Build-Once and Deploy-Everywhere, ensuring rapid deployment and reliable performance.
