WEB DEVELOPER

Location: Colorado Springs, CO

Clearance Requirement - Active Top-Secret clearance

Job Description
Deploy360 is seeking a skilled and motivated individual to join our team as a Web Developer. In this role, you will be responsible for providing web application and database development and design support for the Space Delta 10 website and associated interfaces. You will collaborate with Government personnel and engage with Platform 1 and ODIN offices to ensure seamless software development, hosting support, and execution of special projects. Additionally, you will utilize your expertise in data visualization and User Experience (UX) to enhance the usability and aesthetics of digital devices, wiki websites, and software.

Responsibilities:
- Provide developmental support for the Space Delta 10 website and new interfaces
- Collaborate with Government personnel and external offices for software, hosting, and development support
- Utilize data visualization techniques to enhance user experience
- Design and test interfaces to optimize human-computer interaction
- Ensure compliance with DoD Web Specific Policies
- Implement security measures, session management, and best development practices for web applications

Requirements:
- 2+ years of experience in web development using technologies such as HTML, CSS, JavaScript, Visual C#, Visual Basic, ASP, jQuery, AJAX, and Microsoft SQL
- Bachelor's degree preferred (not required)

Experience (Required):
- Proficiency in web application development, relational database systems, and Object-Oriented Programming
- Familiarity with data visualization and User Experience principles
- Understanding of test interfaces for digital devices, websites, and software
- Knowledge of DoD Web Specific Policies
- Experience with web application security, session management, and best development practices

Experience (Preferred):
- Experience with Agile Development methodology
- Familiarity with Wiki Site Management
- Background in system administration
- Ability to gather and refine specifications and requirements based on technical needs
- Experience maintaining, expanding, and scaling website environments
- Knowledge of integrating data from various back-end services and databases

To be considered for the position, please email <u>info@deploy360.us</u> and include your resume.
