Platform Engineer

Location: Fort Liberty – Fayetteville, NC

Position Summary

We are seeking an experienced Platform Engineer with 6 to 10 years of hands-on experience in designing, building, and maintaining enterprise-level platforms. The ideal candidate will have expertise in Red Hat Linux, Docker, Kubernetes, and DevOps practices, coupled with the ability to operate in a secure and dynamic environment. Your work will directly support mission-critical systems and infrastructure.

Education & Experience (Required):

- Experience: 6 to 10 years of experience in platform engineering, system administration, or related fields.
- Technical Skills:
 - Proficiency in **Red Hat Linux** system administration.
 - Strong expertise in **Docker** for containerization and **Kubernetes** for orchestration.
 - Experience with **CI/CD pipelines**, infrastructure as code (IaC), and automation tools.
 - Familiarity with monitoring and logging tools in distributed environments.
- Soft Skills:
 - Strong problem-solving abilities and attention to detail.
 - Excellent communication and teamwork skills.
- Design, implement, and maintain platform solutions using **Red Hat Linux**.
- Containerize applications and manage deployments using **Docker**.
- Orchestrate and manage containerized environments using **Kubernetes**.
- Apply **DevOps practices** to streamline CI/CD pipelines and automate platform management processes.
- Ensure the security, scalability, and high availability of mission-critical systems.
- Collaborate with cross-functional teams to define infrastructure and platform requirements.
- Monitor system performance and troubleshoot issues to ensure optimal system functionality.
- Stay up-to-date with emerging technologies and recommend improvements to current systems.
- Bachelor's degree in computer science or a related field

Clearance Requirement

- Active Top Secret with SCI eligibility
