Senior Software Developer (Cold Fusion)
Location: Pentagon/Joint Base Andrews

Position Summary

Deploy360 is seeking a **Senior Software Developer (ColdFusion)** to design, develop, and maintain enterprise software solutions. This role focuses on creating scalable and innovative software systems to support mission-critical operations and ensuring compliance with enterprise architectural standards.

Key Responsibilities:

- Design, develop, enhance, and troubleshoot software applications using **ColdFusion, Oracle databases, SQL, JavaScript, HTML5, CSS3**, and **REST API calls**.
- Debug and resolve production issues promptly to maintain operational efficiency.
- Lead the design and development of new software products and significant enhancements to existing systems.
- Coordinate and manage software upgrades, conversions, and integrations across various applications.
- Collaborate with project teams, stakeholders, enterprise architects, and management to gather and implement application requirements.
- Proactively participate in Agile development processes to ensure the timely completion of project deliverables.
- Mentor and provide guidance to junior developers, ensuring high-quality coding practices and technical skill growth.
- Leverage tools such as **Digital.ai Agile development** and **Subversion configuration management** to support development processes.
- Evaluate and recommend software packages, integration tools, and testing frameworks to optimize development workflows.
- Create and maintain architecture designs, software user manuals, and training materials for stakeholders.
- Plan and optimize existing software architecture and ensure the delivery of compliant and secure solutions.
- Maintain and update software documentation, including requirements, architecture, testing, maintenance evaluations, release notes, and bills of materials.
- Assist application owners with compliance activities, including the creation and maintenance of system diagrams, software architecture, and network diagrams.

Required Skills and Qualifications:

- **Experience:** Minimum of 10 years of experience in **ColdFusion, Oracle database, SQL, JavaScript, HTML5, CSS3**, and **REST API calls**.
- **Education:** Bachelor's degree in Computer Science, Information Technology, or a related field.
- **Clearance:** Active **SECRET clearance** required.
- Proven ability to work in controlled and repeatable Agile SDLC environments.
- Strong problem-solving skills and the ability to troubleshoot complex software issues effectively.
- Excellent verbal and written communication skills, with the ability to convey technical concepts to diverse audiences.

Why Deploy360?

At Deploy360, we are committed to leveraging the power of technology to support the mission-critical needs of our clients. We offer a dynamic work environment where innovation, collaboration, and professional growth are encouraged. Join our team and contribute to impactful projects that make a difference.
