## **SharePoint Developer**

**Location: Pentagon/Joint Base Andrews**

### **Position Summary**

Deploy360 is seeking a highly skilled **SharePoint Developer** to support the development, configuration, and enhancement of SharePoint solutions for diverse client portfolios. This role focuses on delivering innovative solutions and technical support to improve collaboration, streamline processes, and enhance information management.

### **Key Responsibilities:**

- Collaborate with teams to provide technical expertise for the development and maintenance of SharePoint environments.
- Produce accurate and high-quality documentation, including technical analyses, project summaries, and system configurations.
- Design, develop, and maintain site collections, document libraries, lists, forms, workflows, and other SharePoint features to meet business requirements.
- Perform administrative tasks, including managing permissions, refining user interfaces, and developing workflows.
- Troubleshoot and resolve SharePoint-related technical issues for ongoing projects and existing systems.
- Create training materials and deliver consultation to users, ensuring successful adoption and compliance with standard operating procedures.
- Participate in working groups to identify and implement SharePoint improvements.
- Analyze user workflows and implement processes to simplify information management and collaboration.
- Provide guidance on technology selection, architecture, software design, and system support for projects.
- Develop SharePoint solutions using technologies such as CSS, HTML5, JavaScript, and Microsoft 365 tools, including Power Platform.
- Analyze and optimize data structures (e.g., tables, lists) and implement database operations using platforms like Oracle, Microsoft SQL Server, and Access.
- Develop project-specific deliverables as well as common architecture solutions across application portfolios, including detailed documentation and design models.

- Produce design documentation and diagrams suitable for inclusion in security and accreditation packages.
- Work in a controlled Agile SDLC environment using development tools such as Microsoft Visual Studio, Microsoft Power Platform, and GitHub repositories.
- Integrate SharePoint solutions with Microsoft 365 tools, including Access and Excel, to enhance data management and reporting.

#### **Required Skills and Qualifications:**

- **Experience:** Minimum of 10 years of hands-on experience in JavaScript, HTML5, CSS3, REST (API calls), Microsoft 365, SharePoint development, SQL Server, and Transact-SQL development.
- **Education:** Bachelor's degree in Computer Science, Information Technology, or a related field.
- **Certifications:** SharePoint certification and Power Platform certification required.
- **Security Clearance:** Active **SECRET clearance** required.
- Strong ability to develop SharePoint solutions that align with business objectives and user needs.
- Excellent written and verbal communication skills for documentation and collaboration.

#### **Why Deploy360?**

At Deploy360, we are committed to leveraging the power of technology to support the mission-critical needs of our clients. We offer a dynamic work environment where innovation, collaboration, and professional growth are encouraged. Join our team and contribute to impactful projects that make a difference.

**To be considered for the position, please email, [info@deploy360.us](mailto:info@deploy360.us) and include your resume.**
